

BONUS F1

Bonus F1 is extremely uniform producing almost perfectly round and large bulbs. The production is high due to its size and uniformity, making yields of 60-90 tons possible. This variety has a strong root system and handles hot conditions very well.

Bonus F1 is particularly suitable for peeling due to its large bulb size and uniformity.

Bonus F1 onion sets are heat treated.

TYPE	long day
MARKET	fresh, short storage
MATURITY	early +
AVERAGE SIZE	60-88 mm, medium large
