

MEDUSA F1

Medusa F1 has 'Spanish' characteristics making it a variety that has the ability to adapt to different weather conditions due to its strong root system and powerful plant habit.

Medusa F1 is a multipurpose-onion that can be stored for a medium-long period and is therefore suitable for onion processors, short storage or fresh market. The skin is firm with a brown-bronze colour. Due to its size, uniformity and easy way of growing, Medusa F1 is a reliable and stable variety with high yielding potential.

Medusa F1 onion sets are heat treated.

“Medusa F1 is an adaptable multipurpose-onion.”

TYPE	long day
MARKET	short storage
MATURITY	early +
AVERAGE SIZE	60-88 mm, medium large
