

# TAKSTAR F1

Takstar F1 is a well-proven variety that is strong against Fusarium. The spring-onion has slender bright green foliage of 6 to 8 leaves and good bolting tolerance. Takstar F1 produces a bulb that is round, uniform and has a thin neck. The golden brown skin is easy to peel making Takstar F1 an excellent candidate to process and market as 'green- or naked onion'.

*Takstar F1 onion sets are heat treated.*

TYPE	long day
MARKET	fresh
MATURITY	early ++
AVERAGE SIZE	50-70 mm
BULB SHAPE	round
PLANT HABIT	medium
SKIN COLOUR	golden brown
BREEDER	Takii

“Takstar F1 is early and easy to peel.”
